DIRECTORS' RESPONSIBILITIES STATEMENT

The Directors are responsible for preparing the financial statements in accordance with applicable law and regulations.

Directors are required to prepare financial statements for each financial year. As per provisions of applicable law Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards ('IFRS'). By law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing those financial statements, the Directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- State whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with applicable laws and regulations. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF QATAR REINSURANCE COMPANY LIMITED

Opinion

We have audited the consolidated financial statements of Qatar Reinsurance Company Limited and its subsidiaries (collectively 'the Group') for the year ended 31 December 2019 which comprise Consolidated Statement of Income, Consolidated Statement of Comprehensive Income / (loss), Consolidated Statement of Financial Position, Consolidated Statement of Changes in Equity, Consolidated Statement of Cash Flows and the related notes 1 to 30, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is International Financial Reporting Standards (IFRSs) issued by International Accounting Standards Board (IASB).

In our opinion, the financial statements:

- give a true and fair view of the Group's affairs as at 31 December 2019 and of its loss for the year then ended; and
- have been properly prepared in accordance with International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report below. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in the UK, including the FRC's Ethical Standard as applied to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the consolidated financial statements is not appropriate; or
- the directors have not disclosed in the consolidated financial statements any identified material uncertainties that may cast significant doubt about the Group's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the consolidated financial statements are authorised for issue.

Overview of our audit approach

Key audit matters	<ul style="list-style-type: none">• Valuation of gross IBNR provision for reinsurance and insurance contract liabilities• Reassessment of Purchase price allocation exercise on acquisition of Markerstudy entities and the fair valuation of acquired net assets
Audit scope	<ul style="list-style-type: none">• We performed an audit of the complete financial information of Qatar Reinsurance Company Limited and audit procedures on specific balances for a further three components• The components where we performed procedures accounted for more than 90% of gross written premium
Materiality	<ul style="list-style-type: none">• Overall materiality of \$10.3m which represents 1.5% of adjusted equity.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in our opinion thereon, and we do not provide a separate opinion on these matters.

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Valuation of the gross IBNR provisions for reinsurance and insurance contract liabilities (included within Reinsurance and Insurance Contract Liabilities and Reinsurance Contract Assets, Note 11)</p> <p>(2019: \$848m, 2018: \$798m)</p> <p>The valuation of gross provisions for reinsurance and insurance contract liabilities incorporates judgement for the expected ultimate cost of claims incurred, but not yet reported (IBNR), at the reporting date. It is reasonably possible that uncertainties inherent in the reserving process, delays in insurers reporting losses to the Group, together with the potential for adverse development, could lead to the ultimate amount paid varying materially from the amount estimated at this reporting date.</p>	<ul style="list-style-type: none"> • We understood and assessed the design and operational effectiveness of the key controls in the reserving process including the review and approval of the reserves, and controls over the extraction of data from the appropriate sources. • Supported by our actuarial specialists we evaluated management’s methodology against market practice and challenged management’s assumptions and their assessment of major sensitivities, based on our market knowledge and industry data where available. The main areas of judgement include the level of reserves held for specific losses, the loss development patterns selected and the initial expected loss ratios. • Using management’s data, we independently re-projected a proportion of the claims provisions investigating significant differences between our projections and management’s booked reserves. Using our own re-projections, we then considered whether the provisions for insurance liabilities held at the year- end fall within a reasonable range of estimates. • We have read the related disclosures and considered whether they satisfy the requirements of accounting standards. 	<p>Taken as a whole, we consider that management’s judgements in the areas highlighted are reasonable based on the information available at the date of the report. The Group’s provisions lie within what we consider to be a reasonable range of estimates.</p> <p>In addition, we consider that the disclosures made are satisfactory and in accordance with IFRS.</p>

<p>Reassessment of Purchase price allocation exercise on acquisition of Markerstudy entities and the fair valuation of acquired net assets</p> <p>On 25 July 2018, QRE completed acquisition of four Gibraltar based entities from Markerstudy Group (“MSG”) for a consideration of \$147.9 million.</p> <p>In the prior year, we considered the identification and valuation of identifiable intangible assets, such as the Framework Agreement and licenses, arising from the acquisition of Markerstudy businesses to be a significant risk due to the nature of judgements and estimates involved.</p> <p>Under the requirements of IFRS 3 Business Combinations, management has up to 12 months since the date of acquisition to review the purchase price allocation exercise.</p> <p>In reassessing the purchase price allocation exercise, a number of judgments and estimates are required to be made. These relate to the valuation of the intangible assets and also the valuation of indemnities provided by the seller at both the date of acquisition and subsequently at the year end.</p> <p>Because of the judgmental nature of these estimates, they are subject to management bias and consequently carry a higher degree of audit risk.</p>	<p>To obtain sufficient audit evidence to assess the valuation of the acquired net assets and the reassessment of the purchase price allocation of Markerstudy acquisition, we:</p> <ul style="list-style-type: none"> • read relevant agreements and board minutes which support the final conclusions in respect of the acquisition accounting and the fair value of acquired net assets as at year-end; • reviewed the opening statement of financial position of Markerstudy entities as at the date of acquisition; • Ensured appropriate recognition of all identifiable intangible assets by understanding the transaction; • Reviewed management’s process over the impairment assessment of the intangible assets. Along with our valuation specialists, we assessed and reviewed the methodology and assumptions adopted by management for calculating the fair values of intangible assets; • for the key assumptions identified, being business volume, profitability, investment return and cost of equity, performed sensitivity analysis to determine whether management’s estimate is within a reasonable range; • ensured that the acquisition accounting and disclosures of the acquisition are in compliance with IFRS 3 Business Combinations; and • in terms of the value of the indemnities provided by the seller, reviewed the indemnification agreement and recalculated the indemnification asset. 	<p>Taken as a whole, we consider that the assumptions and methodology used for calculating fair value of net assets and intangible assets at acquisition and their reassessment during the year are reasonable based on the information available at the date of the report.</p> <p>Further, we consider the Group's fair value of intangible assets lies within what we consider to be a reasonable range and no impairment is required.</p> <p>Furthermore, we consider that the indemnification asset recorded in the financial statements is reasonable.</p>
--	---	--

Emphasis of Matter – Effects of COVID-19

We draw attention to Notes 3 and 30 of the financial statements, which describes the economic and operational consequences the Company is facing as a result of COVID-19 which may impact the potential results of the Company. Our opinion is not modified in respect of this matter.

An overview of the scope of our audit

Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the Group. This enables us to form an opinion on the consolidated financial statements. We take into account size, risk profile, the organisation of the Group and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed.

The Group is a subsidiary of Qatar Insurance Company, which is based in Doha, Qatar. In establishing the overall approach to the Group audit, we determined the type of work that needed to be performed by us, as the Group engagement team, or other EY network firms, operating under our direction and oversight. EY Doha performed audit procedures over investments and IT. Where the work was performed by an EY network firm, we determined the level of involvement we needed to have in the audit work to be able to conclude whether sufficient appropriate audit evidence had been obtained.

The Audit Engagement Partner and senior members of the audit team reviewed the work performed by the EY network firms. This, together with audit procedures performed by us, gave us the evidence we needed for our opinion on the Group's consolidated financial statements.

In assessing the risk of material misstatement to the consolidated financial statements, and to ensure we had adequate quantitative coverage of significant accounts in the consolidated financial statements, we identified three reporting components of the Group. The Group reporting components consists of QIC Europe Limited, Markerstudy Insurance Company Limited and Zenith Insurance Plc. We performed audit procedures related to the Group's components as noted below. In doing so, we also considered qualitative factors and checked we obtained sufficient coverage across all consolidated financial statements line items in the consolidated financial statements. This scope provided us with coverage of more than 95% of equity.

Details of the three components which were audited by component teams are set out below:

Component	Scope	Auditor
QIC Europe Limited	Full	EY Malta
Markerstudy Insurance Company Limited	Full	EY Gibraltar
Zenith Insurance Plc	Full	EY Gibraltar

Involvement with component teams

In establishing our overall approach to the Group audit, we determined the type of work that needed to be undertaken at each of the components by us, as the primary audit engagement team, or by component auditors from other EY global network firms operating under our instruction.

The primary audit team provided detailed audit instructions to the component teams which included guidance on areas of focus, including the relevant risks of material misstatement detailed above, and set out the information required to be reported to the primary audit team.

For the work performed by component auditors, we determined the appropriate level of involvement to enable us to determine that sufficient audit evidence had been obtained as a basis for our opinion on the Group as a whole.

For all components, the primary audit team reviewed key working papers and participated in the component teams' planning, including the component teams' discussion of fraud and error. The work performed on the components, together with the additional procedures performed at Group level, gave us appropriate evidence for our opinion on the consolidated financial statements as a whole.

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the consolidated financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the company to be \$10.3million (2018: \$18.4 million), which is 1.5% (2018: 1%) of adjusted equity (2018: Gross Written Premium). We believe that adjusted equity provides us with a measurement of materiality which is most closely aligned to the key focus of the entity and the users of the consolidated financial statements.

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the company's overall control environment, our judgement was that performance materiality was 50% (2018: 50%) of our planning materiality, namely \$5.1m (2018: \$9.2m). We have determined the percentage as 50% due to changes in the Group as a result of the reorganisation during the year and the audit differences noted in the prior year.

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess of \$510K (2018: \$920K), which is set at 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

Other information

The other information comprises the information included in the annual report set out on page 1, other than the consolidated financial statements and our auditor's report thereon. The directors are responsible for the other information.

Our opinion on the consolidated financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the consolidated financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement set out on page 1, the directors are responsible for the preparation of the consolidated financial statements and for being satisfied that they give a true and fair view,

and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

The objectives of our audit:

- in respect to fraud, are; to identify and assess the risks of material misstatement of the consolidated financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.
- in respect to irregularities, considered to be non-compliance with laws and regulations, are to obtain sufficient appropriate audit evidence regarding compliance with the provisions of those laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements ('direct laws and regulations'), and perform other audit procedures to help identify instances of non-compliance with other laws and regulations that may have a material effect on the financial statements. We are not responsible for preventing non-compliance with laws and regulations and our audit procedures cannot be expected to detect non-compliance with all laws and regulations.

Our approach was as follows:

- We obtained a general understanding of the legal and regulatory frameworks that are applicable to the Group and determined that the direct laws and regulations related to company law and tax legislation, and the reporting framework (IFRSs) and the relevant tax compliance regulations in the UK and overseas jurisdictions in which the Group operates. Our considerations of other laws and regulations that may have a material effect on the consolidated financial statements included permissions and supervisory requirements of the Bermuda Monetary Authority ('BMA').
- We obtained a general understanding of how the Group complies with these legal and regulatory frameworks by making enquiries of management, internal audit, and those responsible for legal and compliance matters. We also reviewed correspondence between the Group and regulatory bodies; reviewed minutes of the Board and Committees; and gained an understanding of the Group's approach to governance.
- We assessed the susceptibility of the Group's consolidated financial statements to material misstatement, including how fraud might occur, by meeting with management within various parts of the business to understand where they considered there was susceptibility to fraud. Where the risk was considered to be higher, we performed audit procedures to address each identified fraud risk. These procedures included testing manual journals and were designed to provide reasonable assurance that the consolidated financial statements were free from fraud or error.
- For direct laws and regulation, we considered the extent of compliance with those laws and regulations as part of our procedures on the related consolidated financial statement items.

- For both direct and other laws and regulations, our procedures involved: making enquiries of those charged with governance and senior management for their awareness of any non-compliance of laws or regulations, inquiring about the policies that have been established to prevent non-compliance with laws and regulations by officers and employees, inquiring about the Group's method of enforcing and monitoring compliance with such policies, inspecting significant correspondence with the regulators.
- The Group operates in the insurance industry which is a highly regulated environment. As such the Senior Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities, which included the use of specialists where appropriate.

A further description of our responsibilities for the audit of the consolidated financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Other matters we are required to address

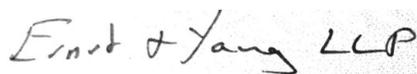

- We were appointed by the company on 23 January 2019 to audit the financial statements for the year ending 2018 and subsequent financial periods.

The period of total uninterrupted engagement including previous renewals and reappointments is 2 years, covering the years ending 31 December 2018 to 31 December 2019.

- The non-audit services prohibited by the FRC's Ethical Standard were not provided to the Group and we remain independent of the company in conducting the audit.
- The audit opinion is consistent with the additional report to the audit committee

Use of our report

This report is made solely to the Group's members, as a body, in accordance with our engagement letter dated 23 January 2019. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Interest paid on lease liabilities		(111)	-
Repayment of lease liabilities		(3,487)	-
Net cash generated from financing activities		(20,378)	146,437
Increase in cash and cash equivalents		12,467	58,204
Cash and cash equivalents at beginning of the year	9	1,021,901	963,697
Cash and cash equivalents at the end of the year	9	1,034,368	1,021,901

The accompanying notes are an integral part of these consolidated financial statements

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

1 LEGAL STATUS AND PRINCIPAL ACTIVITIES

Qatar Reinsurance Company Limited (the “Company”) is primarily engaged in the business of reinsurance and was authorised as a Class 4 insurer by the Bermuda Monetary Authority (“BMA”) on 24 November 2015.

The Company was originally incorporated on 6 December 2009 in the Qatar Financial Centre (“QFC”) in Doha, Qatar under the name of “Q-Re LLC” and with Registration Number 00117. The Company subsequently changed its name to Qatar Reinsurance Company LLC on 18 February 2014. On 24 November 2015, the Company completed the transfer of its seat of incorporation from the QFC to Bermuda and was incorporated in Bermuda under the name of Qatar Reinsurance Company Limited as an exempted company with limited liability and with registration number 50896.

On 26 January 2018 the address of the registered office of the Company changed from Clarendon House, 2 Church Street, Hamilton HM 11, Bermuda, to 71 Pitts Bay Road, Pembroke HM 08, Bermuda, which is also the address of the Company’s head office.

The Company is wholly owned by a single shareholder - QIC Capital LLC (“QICC”) – a limited liability holding company incorporated in the QFC. QICC is a majority-owned (95.74%) subsidiary of Qatar Insurance Company S.A.Q. (“QIC”), a Qatar Shareholding Company listed on the Qatar Stock Exchange and the ultimate parent of the QIC group of companies. The Company operates from its head office in Bermuda and its branch offices established in Switzerland, United Kingdom, Singapore (placed into run-off with effect from 20 July 2018) and the Dubai International Financial Centre.

These consolidated financial statements incorporate the financial information of the Company and its subsidiaries (“collectively “the Group”), all of which have 31 December as their financial year end.

Subsidiaries

In 2018 the Company held 100% of the share capital of Qatar Reinsurance Services LLC. This subsidiary was a limited liability company incorporated in the QFC on 13 October 2015 and was primarily engaged in providing management services to the Group. On 28 November 2019 ownership of Qatar Reinsurance Services LLC was transferred to QICC and the name changed to QIC Global Services (Doha) LLC. The company continues to provide management services to the Group.

On 25 July 2018 the Company completed the acquisition of 100% of the share capital of the Markerstudy Group’s Gibraltar-based insurance companies, namely: Markerstudy Insurance Company Limited; Zenith Insurance PLC; St. Julians Insurance Company Limited; and Ultimate. The Gibraltar-based insurance companies underwrite more than 5% of the UK motor insurance market, generating premiums of about GBP 750 million per year. Ultimate has been placed into runoff and has been de-registered with the insurance regulator in Gibraltar.

On 1 September 2018 the Company acquired 100% of the share capital of QIC Europe Limited (“QEL”). QEL is a limited liability company incorporated in Malta and is authorised by the Malta Financial Services Authority to conduct insurance and reinsurance business in a number of classes of business. Prior to this acquisition QEL was a wholly owned subsidiary of QIC and as such was considered a related party to the Company through common ownership. In 2017 QEL generated gross written premiums of USD 411 million and had capital and surplus of USD 55.8 million.

These consolidated financial statements were approved by the Board of Directors on xxx xxx 2020.

2 APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”)

New and amended standards and interpretations in effect:

The accounting policies adopted in the preparation of the consolidated financial statements are consistent with those followed in the preparation of the Group’s annual consolidated financial statements for the year ended 31 December 2018, except for the adoption of new standards effective as of 1 January 2019.

2 APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) (CONTINUED)

Several other amendments and interpretations apply for the first time in 2019, impact has been disclosed in Note 2. The Group has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

The Group applies, for the first time, IFRS 16 Leases that does not require restatement of previous financial statements. The nature and effect of these changes are disclosed below. Several other amendments and interpretations apply for the first time in 2019, but do not have an impact on the consolidated financial statements of the Group.

• **IFRS 16 – “Leases”**

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model. Lessor accounting under IFRS 16 is substantially unchanged under IAS 17. Lessors will continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 did not have an impact for leases where the Group is the lessor.

The Group adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application. The Group elected to use the transition practical expedient allowing the standard to be applied only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application. The Group also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option (‘short-term leases’), and lease contracts for which the underlying asset is of low value (‘low-value assets’).

The following amounts are recognised under the new standard and included in the respective headings of the consolidated statement of financial position and consolidated statement of income:

	<i>31 December 2019 USD (‘000)</i>	<i>1 January 2019 USD (‘000)</i>
Right of use asset (property and equipment)	2,653	4,254
Lease liability (provisions, reinsurance and other payables)	2,453	4,226
		<i>Year ended 31 December 2019 USD (‘000)</i>
Depreciation charge for right of use asset (depreciation and amortisation)		1,598
Interest expense on lease liabilities (operating and administrative expenses)		97

• **Amendments to IFRS 9: Prepayment Features with Negative Compensation**

Under IFRS 9, a debt instrument can be measured at amortised cost or at fair value through other comprehensive income, provided that the contractual cash flows are ‘solely payments of principal and interest on the principal amount outstanding’ (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to IFRS 9 clarify that a financial asset passes the SPPI criterion regardless of an event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract. These amendments had no impact on the consolidated financial statements of the Group.

2 APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) (CONTINUED)

• **Amendments to IAS 28: Long-term interests in associates and joint ventures**

The amendments clarify that an entity applies IFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in IFRS 9 applies to such long-term interests.

The amendments also clarified that, in applying IFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognised as adjustments to the net investment in the associate or joint venture that arise from applying IAS 28 Investments in Associates and Joint Ventures.

These amendments had no impact on the consolidated financial statements as the Group does not have long-term interests in any associates or joint ventures.

• **Annual Improvements 2015-2017 Cycle**

IFRS 3 Business Combinations

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2019, with early application permitted.

These amendments had no impact on the consolidated financial statements of the Group as there is no transaction where a joint control is obtained.

IFRS 11 Joint Arrangements

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in IFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after 1 January 2019, with early application permitted. These amendments had no impact on the consolidated financial statements of the Group as there is no transaction where a joint control is obtained.

IAS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

The entity applies the amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application permitted.

Since the Group’s current practice is in line with these amendments, they had no impact on the consolidated financial statements of the Group.

2 APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRS”) (CONTINUED)

New and revised standards in issue but not yet in effect:

The following new accounting standards and interpretations have been issued but are not yet effective for the year ended 31 December 2019. The Group has not early adopted any standard, interpretation or amendment that had been issued but is not yet effective. The Group intends to adopt these standards, if applicable, when they become effective. The Group is currently evaluating the impact of these new standards.

• **IFRS 17 Insurance Contracts - Standard issued in May 2018**

IFRS 17 Insurance Contracts establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts issued. It also requires similar principles to be applied to reinsurance contracts held and investment contracts with discretionary participation features issued. The standard was originally effective for annual periods beginning on or after 1 January 2021 with an earlier application is permitted. The effective date has since been extended by the IASB to annual periods beginning on or after 1 January 2023.

For general insurance contracts, IFRS 17 requires discounting of loss reserves expected to be paid in more than one year as well as risk adjustment, for which confidence level equivalent disclosure will be required.

In order to further evaluate the effects of adopting IFRS 17, an IFRS 17 QIC Group Implementation Team has been set up sponsored by the QIC Group Chief Financial Officer, comprising senior management from Finance, Risk, Operations and Investment Operations.

Implementation team has successfully completed the first phase (Gap analysis) and currently working on the detailed operational and financial impact.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

Statement of compliance

The consolidated financial statements have been prepared in accordance with IFRS as issued by the IASB.

Basis of preparation

The accompanying consolidated financial statements have been prepared under the historical cost convention, except for certain financial instruments that are measured at fair value at the end of each reporting period. These consolidated financial statements are presented in United States Dollars (USD) and rounded to the nearest thousand (USD ‘000), unless otherwise indicated.

Financial assets and financial liabilities are offset and the net amount reported in these consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expense are not offset in the consolidated statement of income unless required or permitted by any accounting standard or interpretation, as specifically disclosed in the accounting policies of the Group

The consolidated financial statements also provide comparative information in respect of the previous financial year.

The Group presents its consolidated statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within 12 months after reporting date (no more than 12 months) and more than 12 months after reporting date (more than 12 months) is presented in Note 27.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

COVID-19 Pandemic

At the point of issuing these financial statements, the COVID-19 pandemic continues to develop. Whilst the final impact on the business remains uncertain, the Directors continue to monitor the impact that COVID-19 is having with particular focus on the Group's operations, its balance sheet and its liquidity position.

The Group's current operational focus is on keeping its people healthy while maintaining business continuity. Following government advice across all operating territories, Group management has mandated working from home for all employees and restricted all business air, rail and bus travel. In that time, the Group has proved its operational resilience, successfully maintaining business as usual. This is being achieved through continued contact between the Group's management and its teams through the use of technology and regularly scheduled calls. Following various working from home testing exercises, management is confident that adequate systems and processes are in place to ensure that the Group continues to deliver a high-level service and responsiveness to clients and other counter parties.

The Group is committed to ensuring that its staff receive adequate support and guidance in maintaining their personal health and well-being.

On 31 March 2020 the Group's invested assets, comprising of investments and time deposits, were \$2,055,187,000, representing a circa 5.5% decrease in valuation as a result of the ongoing market turbulence caused by COVID-19. These unrealised losses have since partially reversed and the Group expects them to unwind further as ongoing global efforts offer increasing certainty.

Since year end the Group has seen an overall reduction in the frequency of notified Motor claims that will offset other impacted lines of business. However it is still too early to reliably estimate the full impact of the pandemic on the Group's insurance liabilities.

The Group has specifically assessed its going concern judgment with respect to COVID-19 by stress testing the balance sheet and reviewing its forecast liquidity and solvency across a number of scenarios. Based on this, Management concludes that the Group continues to operate as a going concern. Management is continuing to monitor the impact of the pandemic on an ongoing basis and the ultimate parent company, QIC, will continue to support the Group as necessary.

a) Consolidation, translation and financial instruments

i) Basis of consolidation

Subsidiaries

The consolidated financial statements incorporate the financial statements of the Company and its investees that are considered as subsidiaries as at 31 December 2019 (together referred to as the "Group").

Subsidiaries are investees that the Company has control over. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

a) Consolidation, translation and financial instruments (continued)

i) Basis of consolidation (continued)

Subsidiaries (continued)

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

The financial statements of the subsidiary companies are prepared for the same reporting period as the Company, using consistent accounting policies.

Profit or loss and each component of other comprehensive income (“OCI”) are attributed to the owners of the Company and to the non-controlling interests, even if this results in the non-controlling interest having a deficit balance. All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Changes in the Company’s ownership interests in a subsidiary that do not result in the Company losing control over the subsidiaries are accounted for as an equity transaction. If the Company loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

The carrying amounts of the Group’s interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated statement of income and within equity in the consolidated statement of financial position, separately from company shareholders’ equity.

Transactions eliminated on consolidation

Inter-company balances and transactions, and any unrealised gains arising from intra-group transactions are eliminated in preparing the consolidated financial statements.

Business combination

The management uses the following criteria to evaluate whether a business combination has substance to apply the acquisition method or as per under the uniting of interests’ method where the transaction lacks substance as described in IFRS 3 – Business Combinations:

- the purpose of the transaction;
- the involvement of outside parties in the transaction, such as non-controlling interests or other third parties;
- whether or not the transaction is conducted at fair value;
- The existing activities of the entities involved in the transactions; whether or not it is bringing entities together into a reporting entity that did not exist before; and
- where a new company is established, whether it is undertaken in connection with an IPO or spin-off or other change in control and significant change in ownership.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

a) Consolidation, translation and financial instruments (continued)

i) Basis of consolidation (continued)

Business combination (continued)

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred in a business combination, measured at fair value on the date of acquisition and the amount of any non-controlling interest (“NCP”) in the acquiree. Total fair value is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised and expensed as a part of administrative expenses in the consolidated statement of income.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the income statement.

Goodwill, if any, is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for NCI in the acquiree, over the net identifiable assets acquired and liabilities assumed as at the date of acquisition. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in consolidated statement of income.

Common control transactions

Business combinations involving the transfer of business and net assets in a transaction under common control, are accounted for at the carrying values of the underlying net assets of the transferred business. There are no bargain gain or goodwill on transfer of assets recognised by the Group on common control transactions.

Goodwill

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group’s cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill forms part of a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Goodwill is tested for impairment annually (as at 31 December) and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating unit (or group of cash-generating units), to which the goodwill relates. Where the recoverable amount of the cash-generating unit (or group of cash-generating units) is less than the carrying amount of the cash-generating unit (group of cash-generating units) to which goodwill has been allocated, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

a) Consolidation, translation and financial instruments (continued)

i) Basis of consolidation (continued)

Intangible assets

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at cost which is their fair value as at the date of acquisition. Subsequent to initial recognition,

- Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the consolidated statement of income.
- Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the consolidated statement of income when the asset is derecognised.

The current economic lives applied to the Group's intangible assets are as follows:

<u>Intangible assets acquired</u>	<u>Economic Life</u>
Framework agreement	10 years
Non life insurance license	Indefinite

ii) Foreign currency translation

Foreign operations

The individual financial statements of the Group entities are presented in the currency of the primary economic environment in which they operate (functional currency). For the purpose of these consolidated financial statements, the results and financial position of the subsidiary is expressed in the presentation currency of the Company.

The assets and liabilities of foreign operations are translated to United States Dollars using exchange rates prevailing at the reporting date. Income and expenses are also translated to United States Dollars at the exchange rates prevailing at the reporting date, which do not significantly vary from the average exchange rates for the year. A foreign currency translation reserve is included separately under equity. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the respective functional currencies at the rate of exchange prevailing at the yearend. The resultant exchange differences are included in the consolidated statement of income.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences are recognised in other comprehensive income.

b) Classification of financial assets and financial liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost (AC), fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL). IFRS 9 classification is generally based on the business model in which a financial asset is managed and its contractual cash flows.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b) Classification of financial assets and financial liabilities (continued)

IFRS 9 removes the requirement contained in IAS 39 relating to bifurcation of an embedded derivative from an asset host contract. However, entities are still required to separate derivatives embedded in financial liabilities where they are not closely related to the host contract.

IFRS 9 largely retains the existing requirements of IAS 39 for the classification of financial liabilities with the exception of the treatment of the gains and losses from the Group's own credit, which arise where the Group has chosen to measure a liability at fair value through profit or loss, these gains and losses are recognised in other comprehensive income. There continue to be two measurement categories for financial liabilities: fair value and amortised cost.

i) Initial recognition

Financial assets and liabilities are initially recognised on the trade date. The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVTPL, transaction costs are added to, or subtracted from the amount. Trade receivables are measured at the transaction price. The Day 1 gain or loss is recognised when the fair value of financial instruments at initial recognition differs from the transaction price.

ii) Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Group recognises the difference between the transaction price and fair value in net trading income. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

iii) Measurement categories of financial assets and liabilities

From 1 January 2018, the Group classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost;
- Fair value through other comprehensive income (FVOCI); or
- Fair value through profit or loss (FVTPL)

The Group classifies and measures its derivative and trading portfolio at FVTPL. The Group may designate financial instruments at FVTPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies.

Financial liabilities are measured at amortised cost.

Financial instruments – initial recognition

a) Financial investments at amortised cost

From 1 January 2018, the Group only measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

(i) Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b) Classification of financial assets and financial liabilities (continued)

Financial instruments – initial recognition (continued)

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

(ii) The SPPI test

As a second step of its classification process the Group assesses the contractual terms of financial assets to identify whether they meet the SPPI test. 'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de-minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVTPL.

b) Debt instruments at FVOCI

The Group classifies debt instruments at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and foreign exchange gains and losses are recognised in profit or loss in the same manner as for financial assets measured at amortised cost. On derecognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to profit or loss.

c) Equity instruments at FVOCI

Upon initial recognition, the Group occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of definition of Equity under IAS 32 *Financial Instruments: Presentation* and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as investment income when the right of the payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

b) Classification of financial assets and financial liabilities (continued)

Financial instruments – initial recognition (continued)

d) Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVTPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument-by-instrument basis:

- The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis;
- The liabilities (and assets until 1 January 2018 under IAS 39) are part of a group of financial liabilities (or financial assets, or both under IAS 39), which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- The liabilities (and assets until 1 January 2018 under IAS 39) containing one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered that separation of the embedded derivative(s) is prohibited

Financial assets and financial liabilities at FVTPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVTPL due to changes in the Group's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVTPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVTPL is recorded using contractual interest rate. Dividend income from equity instruments measured at FVTPL is recorded in profit or loss as other operating income when the right to the payment has been established.

e) Derivative financial instruments

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Group enters into derivative transactions with various counterparties. The Group uses derivative financial instruments for economic hedging purposes such as forward currency contracts and interest rate swaps to hedge its foreign currency risks interest rate risks and equity price risk, respectively. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. The changes in the fair value of derivatives are included in net trading income unless hedge accounting is applied.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at FVTPL. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of FVTPL category. However, as an exception to above, a policyholder's option to surrender an insurance contract for a fixed amount (or for an amount based on a fixed amount and an interest rate) is not separated and measured at fair value even if the exercise price differs from the carrying amount of the host insurance liability.

Embedded derivatives that meet the definition of insurance contracts are treated and measured as insurance contracts.

Any gains or losses arising from changes in fair value on derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which are recognised in OCI and later reclassified to profit or loss when the hedged item affects profit or loss.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets

The Group applies a three-stage approach to measuring expected credit losses (ECL) on financial assets carried at amortised cost and debt instruments classified as FVOCI. Assets migrate through the three stages based on the change in credit quality since initial recognition.

a) Overview

The adoption of IFRS 9 in 2018 fundamentally changed the Group's impairment method by replacing IAS 39's incurred loss approach with a forward-looking ECL approach. From 1 January 2018, the Group records an allowance for expected credit loss for debt financial assets not held at FVPL. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL). The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

The Group has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group categorizes its FVOCI assets into stages as described below:

Stage 1: When financial instruments are first recognised, the Group recognises an allowance based on 12 month ECLs. Stage 1 also include financial instruments where the credit risk has improved and the instrument has been reclassified from Stage 2.

Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the life time ECLs. Stage 2 also include instruments, where the credit risk has improved and the loan has been reclassified from Stage 3.

Stage 3: Includes financial assets that have objective evidence of impairment at the reporting date. For these assets, lifetime ECL are recognised and treated, along with the interests calculated. When transitioning financial assets from stage 2 to stage 3, the percentage of provision made for such assets should not be less than the percentage of provision made before transition. Purchased or originated credit impaired assets are financial assets that are credit impaired on initial recognition and are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

For financial assets for which the Group has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

b) The calculation of ECLs

The Group calculates ECLs based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets (continued)

b) The calculation of ECLs (continued)

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- The Probability of Default (“PD”) is an estimate of the likelihood of default over a given time horizon.
- The Exposure at Default (“EAD”) is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date.
- The Loss Given Default (“LGD”) is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that are expected to receive, including from the realisation of any collateral.

Impairment losses and releases are accounted for and disclosed separately from modification losses or gains that are accounted for as an adjustment of the financial asset’s gross carrying value.

The mechanics of the ECL method are summarised below:

- Stage 1: The 12 month ECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.
- Stage 2: When a financial asset has shown a significant increase in credit risk since origination, the Group records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- Stage 3: For financial asset considered credit-impaired, the Group recognises the lifetime expected credit losses for these financial assets. The method is similar to that for Stage 2 assets, with the PD set at 100%.

Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit and loss upon derecognition of the assets.

b) Forward looking information

The Group, for forward looking information, relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Unemployment rates
- Central Bank base rates

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Impairment of financial assets (continued)

Derivative financial instruments

Initial recognition and subsequent measurement

Derivative financial instruments are classified as held for trading unless they are designated as effective hedging instruments.

Derivative financial instruments held for trading are typically entered into with the intention to settle in the near future.

The Group uses derivative financial instruments for economic hedging purposes such as forward currency contracts and interest rate swaps to hedge its foreign currency risks interest rate risks and equity price risk, respectively.

Derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. All derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at FVTPL. These embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of FVTPL category. However, as an exception to above, a policyholder's option to surrender an insurance contract for a fixed amount (or for an amount based on a fixed amount and an interest rate) is not separated and measured at fair value even if the exercise price differs from the carrying amount of the host insurance liability.

Embedded derivatives that meet the definition of insurance contracts are treated and measured as insurance contracts.

Any gains or losses arising from changes in fair value on derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which are recognised in OCI and later reclassified to profit or loss when the hedged item affects profit or loss.

i) Fair value reserve

The fair value reserve represents the gains and losses arising from changes in fair value based on the year-end fair valuation of FVOCI investments.

c) Reinsurance operations

i) Insurance and other receivables

Insurance and other receivables are recognised on business written and measured on initial recognition at the fair value of the consideration received or receivable. The carrying value of the receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the consolidated statement of income. After initial measurement, premiums and other receivables are measured at amortised cost as deemed appropriate.

Premiums receivables are derecognised when the derecognition criteria for financial assets, as described in Note 3 (b), have been met.

Indemnification assets acquired as part of a business combination are initially recognized and measured at fair value as at acquisition date, adjusted for any contractual limitations and credit risk of the indemnifying party. At the end of each subsequent reporting period indemnification asset shall be measured on the same basis as the indemnified liability, subject to any contractual limitations on this amount and, for an indemnification asset that is not subsequently measured at fair value, management's assessment of the collectability of that asset. The indemnification asset shall be derecognized only when it is collected, sold or when the Acquirer otherwise loses the right to it.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

c) Reinsurance operations (continued)

ii) Reinsurance contract assets

The Company cedes insurance risk in the normal course of business as part of its businesses model. Reinsurance assets represent balances recoverable from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurers' policies and are in accordance with the related reinsurance contract.

Reinsurance assets are reviewed for impairment at each reporting date, or more frequently, when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Company may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Company will receive from the reinsurer. The impairment loss is recorded in the income statement.

iii) Reinsurance and other payables

Reinsurance and other payables are recognised when due and measured on initial recognition at the fair value of the consideration received less directly attributable transaction costs. Subsequently, reinsurance and other payables are measured at amortised cost, as deemed appropriate.

iv) Gross written premiums

Gross written premiums are recognised when written and include an estimate for written premiums receivable at the reporting date. Gross written premiums are comprised of premiums on business incepting in the current financial year together with adjustments to estimates of premiums written in prior accounting periods. Estimates are included for pipeline premiums.

Premium on reinsurance contracts are recognised as revenue (earned premiums) proportionally over the period of risk coverage. The portion of premium recognised as written on in-force contracts that relates to unexpired risks at the reporting date are reported as the unearned premium reserve.

v) Premiums ceded to reinsurers

Reinsurance premiums comprise the total premiums payable for the reinsurance cover provided by retrocession contracts entered into during the year and are recognised on the date on which the policy incepts. Reinsurance premiums also include any adjustments arising in the accounting period in respect of retrocession contracts incepting in prior accounting periods. Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date.

vi) Reinsurance contract liabilities

Reinsurance contract liabilities include the outstanding claims provision and the provision for unearned premium. Reinsurance contract liabilities are recognised when contracts are entered into and premiums are charged.

• ***Provision for outstanding claims***

Provision for outstanding claims is recognised at the date the claims are known and covers the liability for losses and loss adjustment expenses based on loss reports from independent loss adjusters and management's best estimate.

Claims provision also includes liability for claims incurred but not reported as at the reporting date. The liability is calculated at the reporting date using a range of historic trends, empirical data and standard actuarial claim projection techniques. The current assumptions may include a margin for adverse deviations. The liability is not discounted for the time value of money.

• ***Unearned premium reserve***

The provision for unearned premiums represents that portion of premiums received or receivable, after deduction of the reinsurance share, which relates to risks that have not yet expired at the reporting date. The provision is recognised when contracts are entered into and premiums are charged, and is brought to account as premium income over the term of the contract in accordance with the nature and type of reinsurance contract written by the Company.

Reinsurance contract liabilities are derecognised when the contract expires, discharged or cancelled by any party to the insurance contract.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

c) Reinsurance operations (continued)

At each reporting date, the Company reviews its unearned premium and unexpired risk, and a liability adequacy test is performed in accordance with IFRS 4 to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums. This calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant non-life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums (less related deferred acquisition costs) is inadequate, the deficiency is recognised in the income statement by setting up a provision for premium deficiency.

vii) Gross claims paid

Gross claims paid include all claims paid during the year and the related external claims handling costs that are directly related to the processing and settlement of claims.

viii) Commission earned and paid

Commissions earned and paid are recognised at the time the policies are underwritten or deferred and amortised over the same period over which the corresponding premiums are recognised in accordance with the earning pattern of the underlying reinsurance contract.

d) Investment income

Interest income

Interest income is recognised in the income statement as it accrues and is calculated by using the effective interest rate method, except for short-term receivables when the effect of discounting is immaterial.

Dividend income

Dividend income is recognised when the right to receive the dividends is established or when received. The right to receive the dividend is established based on the ex-dividend date.

e) General

i) Cash and cash equivalents

Cash and cash equivalents comprise cash in banks and on hand and short-term deposits with an original maturity of three months or less in the consolidated statement of financial position. The cash equivalents are readily convertible to cash.

ii) Investment properties

Investment properties are properties held for capital appreciation. Investment properties are measured initially at cost. Subsequent to initial acquisition, investment properties are then marked to a fair value. The fair values of investment properties are estimated by the Management's external valuer, by reference to market evidence of recent transactions for similar properties. Any change in value is recognised in the consolidated statement of income.

iii) Property and equipment

Property and equipment are carried at historical cost less accumulated depreciation and accumulated impairment losses. Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with the expenditure will flow to the Group.

Ongoing repairs and maintenance are charged to the consolidated statement of income during the financial period they are incurred.

The assets' residual values, useful lives and method of depreciation applied are reviewed and adjusted, if appropriate, at each financial year end and adjusted prospectively, if appropriate. Impairment reviews are performed when there are indicators that the carrying value may not be recoverable. Impairment losses are recognised in the consolidated statement of income as an expense.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

e) General (continued)

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognised in the consolidated statement of income in the year the asset is derecognised.

iv) Depreciation

Depreciation is provided on a straight line basis on all property and equipment and investment properties, other than freehold land which is determined to have an indefinite life. The rates of depreciation are based upon the following estimated useful lives:

Furniture & fixtures - 2 to 5 years

Depreciation methods, useful lives and residual values are reviewed and adjusted if appropriate at each financial year end.

v) Impairment of non-financial assets

An assessment is made at each reporting date to determine whether there is objective evidence that an asset or group of assets is impaired. If such evidence exists, the estimated recoverable amount of that asset is determined and an impairment loss is recognised for the difference between the recoverable amount and the carrying amount. Impairment losses are recognised in the consolidated statement of income.

vi) Provisions

The Group recognises provisions in the consolidated financial statements when the Group has a legal or constructive obligation (as a result of a past event) that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. The provision is created by charging the consolidated statement of income for any obligations as per the calculated value of these obligations and the expectation of their realisation at the reporting date.

vii) Employees' end of service benefits

Provision is made for amounts payable in respect of employees' end of service benefits based on contractual obligations or respective local labour laws of the Group entities, whichever is higher, and is calculated using the employee's salary and period of service at the reporting date.

viii) Current income tax

Although the Company is domiciled in Bermuda where there is no tax levied on corporate profits, the Group does have branch offices and subsidiaries in taxable jurisdictions. Current income tax assets and liabilities in these branches and subsidiaries for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date in the countries where the Group operates branches and subsidiaries, and generates taxable income.

ix) Leases

Although The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement at the inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset, even if that asset is not explicitly specified in an arrangement.

Group as a lessee

The Group recognises right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets for most leases are recognised based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. In some leases, the right-of-use assets are recognised based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognised. Lease liabilities are recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

3 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

e) General (continued)

ix) Leases (continued)

Group as a lessor

Leases in which the Group does not transfer substantially all of the risks and rewards of ownership of an asset are classified as operating leases.

Rental income is recognised as revenue in the consolidated statement of income on a straight line basis over the lease term. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same bases as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

x) Share capital

The Company has issued ordinary shares that are classified as equity instruments. Incremental external costs that are directly attributable to the issue of these shares are recognised in equity.

xi) Segment reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components. All operating segments' operating results are reviewed regularly by the management to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

4 CRITICAL JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions in the application of the Group's accounting policies, which are described in Note 3, that could affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. The estimates and associated assumptions are based on historical experience and other factors and parameters that are considered to be relevant and available when the consolidated financial statements were prepared. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Uncertainty about these assumptions and estimates could result in outcomes that require material adjustment to the carrying value of assets or liabilities affected in future reporting periods. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations, that management has made in the process of applying its accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements:

Estimated credit losses

Assessment of whether credit risk on the financial asset has increased significantly since initial recognition and incorporation of forward-looking information in the measurement of ECL. Refer to Note 3 for Inputs, assumptions and techniques used for estimating impairment of financial assets for more information.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the statement of financial position date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

**4 CRITICAL JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY
(CONTINUED)**

Critical judgements in applying accounting policies (continued)

Claims made under insurance contracts

Claims and loss adjustment expenses are charged to the consolidated statement of income as incurred based on the estimated liability for compensation owed to contract holders or third parties damaged by the contract holders. Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the Company and management estimations for the claims incurred but not reported. The method for making such estimates and for establishing the resulting liability is continually reviewed. Any difference between the actual claims paid and the provisions made are included in the consolidated statement of income in the year of settlement. As of 31 December 2019, the net estimate for unpaid claims amounted to USD 1,081,861,000 (2018: USD 904,624,000).

For certain line of businesses (non-life), in order to estimate the liabilities, the expected loss ratios are calculated for all underlying insurance contracts. The amounts estimated as the difference between the current estimated losses and the reported losses are set aside as the incurred but not reported reserve for the losses that have been incurred but which are not yet known or have still to be reported.

Impairment of insurance and other receivables

An estimate of the collectible amount of insurance and other receivables is made when collection of the full amount is no longer probable. This determination of whether these insurance and other receivables are impaired entails the Company evaluating, the credit and liquidity position of the policyholders and the insurance companies, historical recovery rates including detailed investigations carried out as at reporting date and feedback received from their legal department. The difference between the estimated collectible amount and the book amount is recognised as an expense in the consolidated statement of income. Any difference between the amounts actually collected in the future periods and the amounts expected will be recognised in the consolidated statement of income at the time of collection.

As of 31 December 2019 the net carrying values of insurance receivable and reinsurance receivables amounted to USD 999,391,000 (2018: USD 1,415,893,000) which includes a provision for impairment on insurance receivable and reinsurance receivable amounting to USD 394,000 (2018: USD 403,000).

5 SEGMENT INFORMATION

For management reporting purposes, the Company is organised into business segments based on their products and structure. The reportable operating segments are comprised of Property, Casualty and Other Segments. These segments are the basis on which the Company reports its operating segment information. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements. No inter-segment transactions occurred in 2019 and 2018.

The Property Segment includes business written under the lines of business that includes Property Catastrophe, North America and International Property, Energy, Aviation, Marine, Agriculture and Engineering.

The Casualty Segment includes all Casualty lines and the Motor lines of business.

Other Segment includes business recognised by the Company as Credit and Surety, Residual Value Insurance, and Structured Finance.

Board of directors' remuneration (Note 8)	431	468
Other expenses	12,159	6,363
	<u>59,688</u>	<u>58,150</u>

8 BOARD OF DIRECTORS' REMUNERATION

In accordance with the Bye-Laws of the Company, the Board of Directors' remuneration and expenses for the year 2019 has been proposed at USD 431,000 (2018: USD 468,000).

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

9 CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash in banks and on hand, as well as short-term time deposits which are considered as highly liquid investments that are readily convertible to known amounts of cash.

	<i>2019</i> <i>USD ('000)</i>	<i>2018</i> <i>USD ('000)</i>
Cash in hand and bank balances	301,236	149,465
Time deposits – short term	733,132	872,436
	<u>1,034,368</u>	<u>1,021,901</u>

Time deposits are held for various periods of maturity which are less than three months. These time deposits are subject to an insignificant risk of change in value. As such, the carrying values disclosed above reasonably represent the approximate fair value of the deposits as at 31 December 2019 and 2018. The average interest rate on time deposits is 3.276 % (2018: 4.027%) per annum.

10 INSURANCE AND OTHER RECEIVABLES

	<i>2019</i> <i>USD ('000)</i>	<i>2018</i> <i>USD ('000)</i>
<i>Insurance receivables from insurance companies</i>		
In course of collection	129,003	817,087
Not yet due	870,782	599,209
Provision for doubtful receivables	(394)	(403)
	999,391	1,415,893
<i>Other receivables</i>

	<hr/>	<hr/>	<hr/>
At 31 December 2019	<u>52,298</u>	<u>9,270</u>	<u>61,568</u>

Effective July 25, 2018, the Company acquired 100% of the share capital of Markerstudy's Gibraltar-based insurance companies.

(i) Intangible assets

The following table summarizes the intangible assets recorded in connection with the business acquisitions:

	<i>Amount USD ('000)</i>	<i>Economic useful Life</i>
Framework Agreement	61,308	10 years
Non-life insurance Licenses	9,270	Indefinite
	<hr/>	<hr/>
Intangible assets as of the acquisition date	70,578	
Accumulated amortisation expenses	(9,010)	
	<hr/>	
Net Intangible assets as at 31 December 2019	<u>61,568</u>	

(a) Framework agreement

As part of the transaction related to the sale and purchase of the Carriers, Qatar Re and Markerstudy Group have signed a framework agreement ("Framework Agreement"), which will govern their relationship for the coming 10-year period. Under this agreement, the Carriers will have the right to first refusal for all the non-life insurance business generated by Markerstudy Group (MSG). The Framework Agreement has been valued by applying the dividend discount model ("DDM") under the Income Approach. The fair value of the agreement is provisional pending receipt of the final valuations and expected to have an estimated useful life of 10 years.

(b) Non-life insurance Licenses

Markerstudy Group insurance companies have regulatory licenses from the Gibraltar Financial Services Commission (GFSC) to underwrite non-life insurance business in the United Kingdom and the rest of the European Union. The cost of establishing a licensed insurance company in Gibraltar has been estimated to be approximately GBP 2 million (USD 2,631,000). Accordingly, under the Cost Approach, the value of the licenses of the Carriers were estimated to be GBP 6 million (USD 7,894,000). The non-life insurance licenses of the Carriers have an indefinite useful life.

19 DETERMINATION OF FAIR VALUE AND FAIR VALUES HIERARCHY OF INVESTMENTS

The Group measures financial instruments such as derivatives, and non-financial assets such as investment properties, at fair value at each balance sheet date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- Or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs

19 DETERMINATION OF FAIR VALUE AND FAIR VALUES HIERARCHY OF INVESTMENTS (CONTINUED)

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period

	<i>Level 1</i> <i>USD ('000)</i>	<i>Level 2</i> <i>USD ('000)</i>	<i>Level 3</i> <i>USD ('000)</i>	<i>Total</i> <i>fair value</i> <i>USD ('000)</i>
<i>31 December 2019</i>

Insurance and other receivables	-	-	105,248	105,248
	<u>1,370,348</u>	<u>10,224</u>	<u>115,819</u>	<u>1,496,391</u>
<i>31 December 2018</i>				
Derivative assets	-	1,363	-	1,363
Investment securities	1,309,461	125,685	9,078	1,444,223
Insurance and other receivables	-	-	-	-
	<u>1,309,461</u>	<u>127,048</u>	<u>9,078</u>	<u>1,445,586</u>

Valuation techniques

Listed investment in equity securities and debt securities.

When fair values of publicly traded equity securities and debt securities are based on quoted market prices, or binding dealer price quotations, in an active market for identical assets without any adjustments, the instruments are included within Level 1 of the hierarchy.

Managed funds

In the absence of a quoted price in an active market, they are valued using observable inputs such as recently executed transaction prices in securities of the issuer or comparable issuers and yield curves. Adjustments are made to the valuations when necessary to recognise differences in the instrument's terms. To the extent that the significant inputs are observable, the Group categorises these investments as Level 2.

Over-the-counter derivatives

The Group enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Derivatives are valued using valuation techniques with market observable inputs are mainly options contracts.

Unlisted equity investments

Unquoted available for sale equity investments are recorded at fair values adopting market approach and applying price to book value multiple to arrive at the value of investment. There are no active markets for these investments and the Group intends to hold them for the long term

19 DETERMINATION OF FAIR VALUE AND FAIR VALUES HIERARCHY OF INVESTMENTS (CONTINUED)

Unlisted managed funds

The Group invests in managed funds, including private equity funds, which are not quoted in an active market and which may be subject to restrictions on redemptions such as lock up periods, redemption gates and side pockets. The Group's investment managers considers the valuation techniques and inputs used in valuing these funds as part of its due diligence prior to investing, to ensure they are reasonable and appropriate and therefore the NAV of these funds may be used as an input into measuring their fair value. In measuring this fair value, the NAV of the funds is adjusted, as necessary, to reflect restrictions on redemptions, future commitments, and other specific factors of the fund and fund manager. In measuring fair value, consideration is also paid to any transactions in the shares of the fund. Depending on the nature and level of adjustments needed to the NAV and the level of trading in the fund, the Group classifies these funds as Level 3.

Insurance and other receivables

Indemnification assets acquired as part of a business combination are initially recognized and measured at fair value as at the acquisition date and are adjusted for any contractual limitations and credit risk of the indemnifying party. At the end of each subsequent reporting period the indemnification asset shall be measured on the same basis as the indemnified liability, subject to any contractual limitations on this amount. For an indemnification asset that is not subsequently measured at fair value, management's assessment of the collectability of that asset is used to determine the fair value. Group classifies this asset as Level 3.

Level 3 reconciliation

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within Level 3 between the beginning and the end of the reporting period:

	<i>2019</i> <i>USD</i> <i>('000)</i>	<i>2018</i> <i>USD</i> <i>('000)</i>
Balance at 1 January	9,078	6,280
Additions during the year	107,472	3,508
Net (loss)/gain in fair value reserve	<u>(731)</u>	<u>(710)</u>
Balance at 31 December	<u>115,819</u>	<u>9,078</u>

Sensitivity analysis

For the fair value of equity securities and receivables, reasonably possible changes at the reporting date to one of the significant unobservable inputs, holding other inputs constant, would have following effects on net profit.

		<i>2019</i> <i>USD</i> <i>('000)</i>	<i>2018</i> <i>USD</i> <i>('000)</i>
NAV of the funds	5%	5,791	454
NAV of the funds	-5%	(5,791)	(454)

20 DERIVATIVE INSTRUMENTS

In the ordinary course of business, the Group enters into various types of transactions that involve derivative financial instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in price in one or more underlying financial instrument, reference rate or index. Derivative financial instruments include forward contracts, swaps and equity options structures.

The Company employs various derivative option strategies which are intended for hedging currency exposure, managing interest rate and insurance risk, and for income enhancement. The derivative financial instruments held by the Company include forward contracts, swaps and equity options structures.

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

20 DERIVATIVE INSTRUMENTS (CONTINUED)

The Group has purchased interest rate swap contracts to match the expected liability duration of insurance contracts, to swap floating rates of the backing assets, to fixed rates over the main duration of the related insurance contracts. The Group also manages exchange rate risk on the Group's net currency exposure by using forward exchange contracts. Both of these strategies are considered as economic hedges, but do not meet the hedge accounting criteria.

Derivative products valued using a valuation technique with market observable inputs (Level 2) are mainly interest rate swaps, currency swaps and forward foreign exchange contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves

The table below shows the notional amounts analysed by the term to maturity. The notional amount is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at yearend and are neither indicative of the market risk nor credit risk.

	<i>Notional amount</i> USD ('000)	<i>Derivative asset</i> USD ('000)	<i>Derivative liability</i> USD ('000)	<i>Within 3 months</i> USD ('000)	<i>3 to 12 months</i> USD ('000)
31 December 2019					
<i>Over the Counter Derivatives:</i>					
Credit and interest rate derivatives	265,100	-	(24,928)	40,000	225,100
Equity derivatives	24,628	-	(708)	24,628	-
Foreign exchange derivatives	359,538	2,415	(229)	359,538	-
	649,266	2,415	(25,865)	424,166	225,100
31 December 2018					
<i>Over the Counter Derivatives:</i>					
Credit and interest rate derivatives	429,850	887	(5,752)	-	429,850
Equity derivatives	24,041	-	(393)	24,041	-
Foreign exchange derivatives	119,807	476	-	112,307	7,500
	573,698	1,363	(6,145)	136,348	437,350

Various option strategies are employed for hedging, risk management and income enhancement. All calls sold are on assets held by the Group.

Foreign Exchange derivatives

Foreign exchange derivatives include forwards and options and are contractual agreements in relation to a specified currency at a specified price and date in the future. The options are contractual agreements under which the seller (writer) grants the purchaser (holder) the right, but not the obligation, to either buy or sell at fixed future date or at any time during a specified period, a specified amount of a currency, at a pre-determined price. The interest rate and credit derivative contracts are over-the-counter contracts transacted in the over-the-counter market and changes in contract values are settled daily.

Equity derivatives

Equity derivatives include options and swaps and are contractual agreements in relation to a specified equity instrument at a specified price and date in the future. The equity derivative contracts are over-the-counter contracts transacted in the over-the-counter market and changes in contract values are settled daily.

Credit and interest rate derivatives

Credit and interest rate derivatives include swap contracts to exchange one set of cash flows for another, generally fixed and floating interest payments in a single currency without exchanging principal. In the case of credit default swaps the counterparties agree to make payments with respect to defined credit events based on specified notional amounts. The forward exchange derivative contracts are over-the-counter contracts transacted in the over-the-counter market and changes in contract values are settled daily.

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

21 SHORT TERM BORROWINGS

As part of the Group's margin trading strategy, the Group uses borrowings to finance its fixed income securities.

	<i>2019</i> <i>(USD '000)</i>	<i>2018</i> <i>(USD '000)</i>
Borrowings against fixed income securities	<u>493,463</u>	<u>487,967</u>

The net increase in short term borrowings consists of a net borrowing of USD 5,496,000 in the form of cash. There was nil impact on the net increase due to any impact of foreign currency exchange differences.

As of 31 December 2019 and 2018, interest expense related to these short term borrowings amounted to USD 13,682,000 and USD 11,618,000, respectively.

22 SHARE CAPITAL

	<i>2019</i>		<i>2018</i>	
	<i>No of shares</i>	<i>USD</i>	<i>No of shares</i>	<i>USD</i>
Authorised				
<i>Ordinary shares of USD 1 each</i>	<u>1,200,000</u>	<u>1,200,000</u>	<u>1,200,000</u>	<u>1,200,000</u>
Issued and fully paid up				
<i>Ordinary shares of USD 1 each</i>	<u>1,000,000</u>	<u>1,000,000</u>	<u>1,000,000</u>	<u>1,000,000</u>

There has been no movement in the authorised or issued and fully paid share capital of the Company during 2019 and 2018.

23 CONTRIBUTED SURPLUS

The Contributed surplus reflects the amount of consideration received from QIC Capital L.L.C. in excess of the par value of the shares issued.

The Contributed surplus recognised in the consolidated statement of financial position is distributable to the shareholders as a dividend in the normal course of business, subject to certain restrictions and provisions in this respect that are specified in the Bermuda Companies Act 1981.

The Contributed surplus as at 31 December 2019 and 2018 is comprised of the following:

	<i>2019</i> <i>USD ('000)</i>	<i>2018</i> <i>USD ('000)</i>
(i) On cancellation of shares after change in legal domicile	251,651	251,651
(ii) On merger of Antares Re business as on 31 December 2015	243,717	243,717
(iii) Contribution from Parent Company during 2016	<u>200,000</u>	<u>200,000</u>
	<u>695,368</u>	<u>695,368</u>

24 FAIR VALUE RESERVE

The fair value reserve arose from the revaluation of financial instruments measured at fair value through other comprehensive income in 2019 and 2018 as per the accounting policies detailed in Note 3.

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

25 PERPETUAL SUBORDINATED TIER 2 FIXED RATE NOTES

On 13 March 2017, the Company issued USD 450 million Regulation S Perpetual non-call 5.5 year subordinated Tier 2 notes into the international debt capital markets listed on the Irish Stock Exchange. The carrying value of the notes is USD 443,724,000 (2018 USD 443,845,000), which reflects the net proceeds received after related expenses.

These notes meet the characteristics as set forth in the Insurance (Eligible Capital) Rules 2012 issued in Bermuda to be treated as Tier 2 capital. The notes are guaranteed on a subordinated basis by QIC. The initial coupon has been set at 4.95% per annum and will remain fixed until the first call date in September 2022, when it will be reset on the basis of the mid swap rates for U.S. dollar interest rate swap transactions with a maturity of five years plus the initial margin, and will be reset every five years thereafter. The notes have been assigned an issue rating of 'BBB+' by S&P Global Ratings and have provided eligible Tier 2 capital to further enhance the Company's financial strength.

26 RELATED PARTY TRANSACTIONS AND AMOUNTS DUE TO RELATED PARTIES

a) Transaction with related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions and directors of the Group and companies of which they are key management personnel. Parties are also considered to be related through common ownership. The Group enters into transactions with its associate and key management personnel in the normal course of business. The pricing policies and terms of these transactions with related parties are made on terms equivalent to those that prevail in arm's length transactions

Significant related party transactions included reinsurance agreements with QIC and service level agreements with related service companies under common ownership.

The balance due to related parties predominantly represents balances due to Qatar Insurance Company S.A.Q (the "ultimate parent company") in respect of internal quota share arrangements in place with the Group entities.

The significant related party transactions and amount due to related parties were as follows:

	<i>2019</i> <i>USD ('000)</i>	<i>2018</i> <i>USD ('000)</i>
Reinsurance premium to QIC	<u>(568,843)</u>	<u>(805,515)</u>
Reinsurance recoveries from QIC	<u>1,111,329</u>	<u>1,154,805</u>
Net commission from QIC	<u>94,001</u>	<u>260,490</u>
Service level fees	<u>5,449</u>	<u>-</u>
Amounts due to related parties	<u>164,753</u>	<u>792,417</u>

b) Compensation of key management personnel

	<i>2019</i> <i>USD('000)</i>	<i>2018</i> <i>USD('000)</i>
Salaries and other short term benefits	<u>1,406</u>	<u>1,520</u>
Employees' end of service benefits	<u>70</u>	<u>88</u>
Total	<u>1,476</u>	<u>1,608</u>

Outstanding related party balances at reporting date are unsecured and interest free. Also, the Board of Directors' remuneration proposed for the year ended 31 December 2019 is detailed in Note 8.

27 RISK MANAGEMENT

The Group in the normal course of its business derives its revenue mainly from assuming and managing insurance risks for profit while also benefiting from the investment return on its invested asset base. The Group is mainly exposed to the following risks;

- Insurance risk,
- Market, investment, liquidity and concentration risk
- Credit risk,
- Operational and systems risk
- Group risk,
- Strategic risk and
- Reputational

The primary objective of the Group's risk and financial management framework is to protect the Group's shareholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. In order to achieve this it is of critical importance to have efficient and effective risk management systems in place.

a) Governance framework

The Group has established a sound and effective Corporate Governance framework that is appropriate to the size, nature, complexity and risk profile of the Group. The governance framework supports the sound and prudent management of the Company and its subsidiaries' activities to ensure the protection of policyholders and other applicable stakeholders.

A risk management function has been established with clear terms of reference from the board of directors, its committees and the associated executive management committees, across the Group. This is supplemented with a clear organisational structure with documented delegated authorities and responsibilities from the board of directors to executive management committees and senior managers. Lastly, a Group policy framework which sets out the risk profiles for the Group, risk management, control and business conduct standards for the Group's operations has been put in place. Each policy has a member of senior management charged with overseeing compliance with the policy throughout the Group.

The Board of Directors approves the Group's risk appetite and risk management policies, and meets regularly to approve any commercial, regulatory and organisational requirements of such policies. These policies define the Group's identification of risk and its interpretation, limits its structure to ensure the appropriate quality and diversification of assets, align underwriting and reinsurance strategy to the corporate goals, and specify reporting requirements.

(b) Capital management framework

Capital adequacy is maintained with reference to risk appetite and tolerance statements, which reference regulatory and internal model solvency ratios.

The Group is required by the Bermuda Monetary Authority ("BMA") to hold available statutory capital and surplus of an amount that is equal to or exceeds the Enhanced Capital Requirement ("ECR"). The ECR is the higher of the Bermuda Solvency Capital Requirement ("BSCR") (the BMA standard formula capital requirement) and the Minimum Margin of Solvency ("MSM"). The BSCR forms part of the regulatory regime that has achieved equivalence with Europe's Solvency II.

Balances and ratios at the end of 2018 indicate the requirements and compliance for 2019. At the end of 2018, the Company had total available statutory capital and surplus of USD 1,089.0 million (USD 1,211.9 million at the end of 2017) exceeding the MSM and ECR by USD 495.3 million and resulting in an ECR ratio of 183% (199% at the end of 2017). The Company's BSCR coverage ratio was 207% at the end of 2018 (401% at the end of 2017).

QEL is required by the MFSA to hold available own funds of an amount that is equal to or exceeds the Minimum Capital Requirement ("MCR") and Solvency Capital Requirement, in accordance with the Solvency II Directive. The SCR is calculated using the Solvency II standard formula. Similarly the Gibraltar based subsidiaries are required by the GFSC to hold available own funds of an amount that is equal to or exceeds the Minimum Capital Requirement ("MCR") and Solvency Capital Requirement, in accordance with the Solvency II Directive.

27 RISK MANAGEMENT (CONTINUED)

Companies within the Group remain compliant with regulatory capital requirements.

(c) Risk Management framework

The Group has established a risk management framework by which risks are identified, measured, mitigated and managed. The Group has established a framework of internal controls which seeks to mitigate risks and limit the probability of losses or other adverse outcomes during the implementation of the strategic objectives and business plan, as well as providing a framework for the overall management and oversight of the business. The controls are rated according to their effectiveness of both design and performance, with independent challenge provided by the risk management function. Internal audit also provides independent assurance. The framework provides a basis for understanding the risks that the Group is exposed to and its ability to identify, assess, control and mitigate these risks.

(d) Insurance risk

The principal risk the Group faces under insurance contracts is that the actual claims or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, and subsequent development of long-tail claims.

(d) Insurance risk (continued)

The Group manages the insurance risk through the careful selection and implementation of its underwriting strategy and guidelines together with the adequate reinsurance arrangements and proactive management of claims. The concentration of insurance risk exposure is mitigated by careful selection and implementation of the underwriting strategy of the Group. Underwriting limits are in place to enforce risk selection criteria, and an exposure management framework monitors and limits exposure to peak peril zones within the context of defined risk appetite.

Insurance risk can be broken down into underwriting (including catastrophe risk) and reserve risk.

Underwriting risk relates to the unexpired risk on business already incepted or bound and reflects the risk that premiums are not sufficient to cover future losses. The Group manages underwriting risk through various governance and control mechanisms under the oversight of the Underwriting and Portfolio Management Committee ("UPMC"), which comprises senior representatives from the underwriting, risk, claims and actuarial functions.

Detailed policies and guidelines exist relating to:

- Underwriting authorities;
- Pricing methodologies; and
- Risk accumulations.

In relation to catastrophe risk pricing utilises proprietary pricing tools blended with internal analysis. Aggregate catastrophe risk is subject to defined limits which are monitored using an internally developed exposure management tool.

The Group purchases both treaty and facultative reinsurance to manage insurance risk in the context of the defined risk appetite, to protect the capital base and manage volatility.

The Group actively manages claims in order to identify, measure and manage losses while delivering on obligations to policyholders.

The reserve risk element of insurance risk arises from the inherent uncertainty surrounding the adequacy of the reserves or technical provisions set aside to cover the insurance liabilities. The risk is that the current reserves, including those incurred but not yet reported, are not sufficient to cover the run off of the claims which have already occurred.

27 RISK MANAGEMENT (CONTINUED)

Reserve risk exposure is managed within the actuarial function and through defined reserving practices which are overseen and approved by the Reserving Committee, which comprises various members of the executive management team. The Reserving Committee ultimately determines the management best estimate or reserves based on advice from the reserving actuaries and consultation with underwriters, exposure management and claims. If there were any disagreement between the Reserving Committee and the loss reserve specialist (a role defined under Bermuda regulatory requirements), these would be escalated to the Board for resolution.

Key assumptions

The principal assumption underlying the liability estimates is that the Group's future claims development will follow a similar pattern to past claims development experience. This includes assumptions in respect of average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgments are used to assess the extent to which past trends may not apply in the future, for example one-off occurrence changes in market factors such as public attitude to claiming, economic conditions, as well as internal factors such as portfolio mix, policy conditions and claims handling procedures. Judgment is further used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimated. Other key circumstances affecting the reliability of assumptions include variation in interest rates, delays in settlement and changes in foreign currency rates.

(d) Insurance risk (continued)

Sensitivities

The general insurance claims provisions are sensitive to the key assumptions shown below. It has not been possible to quantify the sensitivity of certain assumptions such as legislative changes or uncertainty in the estimation process.

The analysis below is performed for possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, net profit and equity.

	<i>Change in assumptions</i>	<i>Impact on liabilities USD ('000)</i>	<i>Impact on net profit USD ('000)</i>	<i>Impact on equity USD ('000)</i>
31 December 2019				
Net incurred claim cost	10%	82,900	(82,900)	-
Net incurred claim cost	-10%	(82,900)	82,900	-
31 December 2018				
Net incurred claim cost	10%	65,444	(65,444)	-
Net incurred claim cost	-10%	(65,444)	65,444	-

Claims development table

The Group maintains reserves in respect of its insurance business in order to protect against adverse future claims experience and developments. The following tables show the estimates of cumulative incurred claims, including both claims notified and IBNR for each successive accident year at each reporting date, together with cumulative payments to date. The top half of each table below illustrates how the Group's estimate of total claims outstanding for each accident year has changed at successive year-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing in the consolidated statement of financial position.

With the exception of the proportional and non-proportional reinsurance business, an accident-year basis is considered to be most appropriate for the business written by the Group. Given the nature of reinsurance claims and the difficulties in identifying an accident year for each reported claim, these claims are reported separately and aggregated by reporting year (reporting year basis) – that is, with reference to the year in which the Group was notified of the claims. This presentation is different from the basis used for the claims development tables for the other insurance claims and entities of the Group, where the reference is to the actual date of the event that caused the claim (accident-year basis).

Four years later	(559,334)	(679,025)					
Five years later	(611,937)						
Cumulative claims paid	(611,937)	(679,025)	(1,209,697)	(1,199,879)	(1,411,411)	(406,781)	(5,518,730)
Total gross claims liabilities 2014 – 2019	119,812	155,333	241,389	451,632	584,276	1,209,535	2,761,977
Reserve in respect of prior years (Before 2014)							123,349
Total gross claims liabilities							2,885,326
Current estimate of surplus/(deficiency)	(97,669)	(51,141)	(182,574)	75,302	(44,459)		
Surplus/(deficiency) % of initial gross reserve	(15%)	(7%)	(14%)	4%	(2%)		

In 2018, the acquisition of QEL had added USD 229,008,000 of gross claims liabilities to the above totals, comprised of USD 488,414,000 of gross cumulative claims less USD 259,406,000 of total claims paid. In 2018 the Markerstudy Group had added USD 525,293,000 of gross claims liabilities with total claims of USD 3,438,795,000 less USD 2,913,502,000 of total paid losses.

(e) Market risk

Market risk can cause the Group to suffer losses due to unfavourable developments in the financial markets. Market risk arises as a result of our currency exposures, interest rate and default risk on the fixed income portfolio, and equity price risk as a result of the equities that the Group holds within the investment portfolio.

The Group limits market risk by maintaining a diversified portfolio and by continuous monitoring of developments in equity and bond markets. In addition, The Group actively monitors the key factors that affect stock and bond market movements, including analysis of the operational and financial performance of investees. The Group's investment guidelines and associated mandates are intended to limit its exposures to market risk and volatility, and the adherence to these guidelines and their continued suitability are overseen by the Investment Committee of the Board. In particular the Group limits its exposure to assets such as fixed income securities, cash deposits, private

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

27 RISK MANAGEMENT (CONTINUED)

(e) Market risk (continued)

equity, hedge funds and other (non-fixed income/non-equity) managed funds. However the investment portfolio is heavily weighted towards the fixed income securities and cash deposits. The allocation to other investments such as equities and alternatives is less than 2% (2018: 2%) of the overall invested assets.

(i) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument (asset or liability) will fluctuate because of changes in foreign exchange rates. The Group is exposed to currency risk to the extent that its assets are denominated in different currencies to its liabilities. Certain currency risk is managed through hedging. The table below summarises the Group's exposure to foreign currency exchange rate risk at reporting date by categorising financial assets and liabilities by major currencies.

31 December 2019

*Others mainly represents exposure in minor currencies with immaterial currency risk.

The analysis that follows is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit before tax and equity due to changes in the fair value of currency sensitive monetary assets and liabilities including insurance contract claim liabilities. The correlation of variables will have a significant effect in determining the ultimate impact on market risk, but to demonstrate the impact due to changes in variables, it is necessary to change the variables on an individual basis.

(ii) Interest rate risk

Interest rate risk is the risk of changes in market interest rates which may reduce the overall return of interest bearing securities, or reduce the fair market value of the fixed income security. The Group invests in fixed income securities, and holds cash deposits that are subject to interest rate risk.

The Group's interest risk policy requires managing interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest bearing financial assets and interest bearing financial liabilities.

The Group manages and limits its interest rate risk by monitoring changes in interest rates in the currencies in which its cash and investments are denominated, and reacting to these changes in a timely and efficient manner. The Group diversifies its portfolio such that it has no significant concentration of interest rate risk.

The sensitivity of the Group's investment portfolio to interest rate movements is detailed below, assuming linear movements in interest rates:

<i>Changes in variables</i>	<i>31 December 2019</i>		<i>31 December 2018</i>

(iii) Price risk

Price risk is the risk that the fair value of or income from a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Group's equity price risk exposure relates to financial assets and financial liabilities whose values will fluctuate as a result of changes in market prices. The Group's risk appetite and tolerance statements, and Investment Mandate limit the exposures to equity price risk.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit or loss and equity.

	<i>Changes in variables</i>	<i>31 December 2019</i>		<i>31 December 2018</i>

At 31 December 2019

27 RISK MANAGEMENT (CONTINUED)

(f) Investment risk

Investment risk can arise as a result of implementing an inappropriate investment strategy. The Group's investment strategy is tailored to meet the Group's business needs, objectives and regulatory requirements.

The Investment Committee of the Board approves and monitors the implementation of the Investment Mandate by the investment advisors, taking into consideration these objectives and requirements. An update on the investment portfolio is included in the Investment Committee meeting materials. Asset allocations are compared to minimum and maximum allocations and constraints per the investment mandate and, risk appetite and, tolerance statements to ensure compliance.

(g) Liquidity risk

Liquidity risk arises when the Group is unable to meet its payment obligations as and when they fall due. The Group measures this risk by assessing the appropriateness of the controls in place to monitor and manage liquidity risk exposure and supplement this with cash flow analysis arising from stress testing exercises such as those conducted as part of the Exposure Management Framework.

Liquidity risk is managed through the Group's overall investment strategy which is focused on allocations to more liquid instruments and wider monitoring of the overall liquidity profile of the investment portfolio. At an operational level liquidity requirements are monitored on a regular basis, and management ensures that sufficient funds are available to meet any commitments as they arise. The actuarial team provide information to the investment managers on a quarterly basis relating to the maturity profile of the insurance liabilities in order to facilitate appropriate asset allocations. The Group risk appetite statements in relation to liquidity require that the average duration of assets is no longer than the average duration of liabilities.

Maturity profiles

The table below summarises the maturity profile of the financial assets and financial liabilities of the Group based on remaining undiscounted contractual obligations, including interest payable and receivable. For insurance contracts liabilities and reinsurance contract assets, maturity profiles are determined based on estimated timing of net cash outflows from the recognised insurance liabilities. Unearned premiums and the reinsurer's share of unearned premiums have been excluded from the analysis as they are not contractual obligations.

(h) Concentration risk

Concentration risk can arise when the investment portfolio is not appropriately diversified across counterparties, geographical regions and industries. Concentration risk is measured with reference to the Group's risk appetite and tolerance statements, which limit the concentration of asset holdings on a regional, country and counterparty level, ensuring the investment portfolio is appropriately diversified.

(i) Credit risk

Credit risk arises from both the underwriting and investment activities of the Group. This represents the risk of counterparties defaulting and not being able to make payments resulting in losses to Qatar Re. A credit risk event can occur due to the failure of reinsurers to settle claims in full, failure of a broker to pass on premiums or failure of a bank or invested party to return cash.

To monitor the Group's credit risk, the outwards reinsurance team actively monitors exposure to single reinsurance counterparties. The technical accounting department prepare and monitor aged debt reports, establishing provisions for amounts which are not expected to be recovered due to default. Exposure to brokers is captured within a dashboard by the underwriting department. The security rating of all banking and custodian counterparties is actively monitored. For all classes of financial assets held by the Group, other than those relating to reinsurance contracts, the maximum credit risk exposure to the Group is the carrying value as disclosed in the consolidated financial statements at the reporting date.

To minimise our exposure to significant losses from reinsurer insolvencies, the Company evaluates the financial condition of its reinsurers. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment. Minimum security ratings or collateral requirements are in place for reinsurance counterparties. An approval process is in place for accepting all new reinsurers and banking counterparties, with minimum security ratings also in place for all banking and investment counterparties. All brokers are subject to due diligence procedures.

(j) Operational and systems risk

Operational risk arises from the failure of or inadequate processes, people or systems or from external events that impact the operational capability of the Group. The Group monitors operational risk exposures through its risk register and emerging risk processes which are overseen by the Risk & Capital Committee of the Board. This risk register and emerging risk process also cover strategic risks, reputational risks and legal and litigation risks.

The Group seeks to manage operational risk exposure through the implementation of a robust internal control framework and an effective governance framework. The Group has detailed systems and procedures manuals with effective segregation of duties, access controls, authorisation and reconciliation procedures, staff training and assessment processes etc. with a compliance and internal audit framework. Business risks such as changes in environment, technology and the industry are monitored through the Group's strategic planning and budgeting process. The Group has established business continuity and disaster recovery plans.

(k) Group risk

Group risk represents the risk arising as a result of being part of an insurance group, including exposures resulting from intra-group transactions. It arises from the relationship that the Group has with the parent group, including the reinsurance cover provided by QIC and the dependence on the QIC group credit rating and parental guarantee. Operational dependency is limited to only one material intra-group outsourcing contract relating to investment advisory services.

(l) Strategic risk

The Group has identified a number of strategic risks within the risk register, covering risks to the planning, communication and execution of the business plan, and risks associated with the management and availability of capital. The risk of business strategy failure is mitigated through the review and sign off of the Group's business plan by the Board and alignment of the business plan, risk appetite, capital requirements and underwriting guidelines. Stress and scenario testing help to identify and assess the risks to the business plan. All Board members and Officers of the Group are subject to requirements to confirm that they are fit and proper to discharge their responsibilities, which includes providing the necessary strategic direction.

(m) Reputational risk

Reputational risk arises as a result of adverse publicity regarding business practices or associations. The risk is mitigated through the Group's corporate governance framework and Board oversight of its strategies, policies and risk appetite. The Group is committed to complying with sound business practices and compliance with applicable laws and regulations.

(n) Capital management

At any given time, the Group's capital management policy is to maintain a strong capital base to support the business plan based on its own view of the capital required, based on the principles applicable to operating in a Solvency 2 equivalent jurisdiction, while also meeting prescribed regulatory capital requirements.

Qatar Re has formally documented a Capital Management Action Plan which identifies various thresholds of capital depletion and the associated remedial action that the Group anticipates it would undertake in the defined scenarios.

Solvency self-assessment procedures are in place which enable the Group to identify, assess, monitor, manage, and report on the current and emerging risks faced, and to determine the capital necessary to ensure that overall solvency needs are met at all times.

Qatar Reinsurance Company Limited

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

At 31 December 2019

28 CONTINGENCIES, GUARANTEES AND COMMITMENTS

The Group, like most other insurance and reinsurance companies, is continuously involved in legal proceedings, claims and litigation in the normal course of business. As at 31 December 2019 there are no additional contingent liabilities to establish in relation to any of these legal proceedings.

The Group is also subject to insurance solvency regulations in all of the territories in which it issues insurance contracts. There are no contingencies associated with the Group's compliance or lack of compliance with these regulations.

Letters of Credit:

The Company provides letters of credit to clients as additional security for outstanding recoverables from the Company. The majority of these clients represent U.S. insurance companies. As the Company is not an admitted reinsurer in the U.S., the terms of certain U.S. reinsurance contracts require Qatar Re to provide letters of credit or other terms of collateral to clients in order that such clients may include any recoverable balances from Qatar Re as an admitted asset in their U.S. statutory financial statements. The Company has in place unsecured letter of credit facilities with various highly rated banking institutions that are for the provision of a letter of credit mostly in favour of U.S. ceding companies, as well as ceding companies from other jurisdictions. These banking institutions are all included on the NAIC List of Qualified U.S. Financial Institutions. Letters of Credit under these facilities totalling USD 505,257,000 were issued as at 31 December 2019 (2018: USD 361,389,000).

Guarantee:

The Company has provided a guarantee to QEL, whereby the Company guarantees certain amounts payable to QEL by specified third parties. The intent of the guarantee is to transfer credit risk to the Company as a part of a capital management strategy. The maximum amount payable under the guarantee as at 31 December 2019 was USD 258,079,000 (2018: 103,000,000).

In 2018, the Company had provided a guarantee to ZIP and MICL, whereby the Company guaranteed certain amounts payable to ZIP and MICL by a specified third party. The intent of the guarantee was to transfer credit risk to the Company as a part of a capital management strategy. The maximum amount payable under the guarantee was approximately USD 190,590,000 at 31 December 2018. During the year this guarantee was transferred to QIC.

29 BUSINESS COMBINATION

Markerstudy Group Insurance Companies

On 25 July 2018, the Company acquired 100% of the share capital of Markerstudy's Gibraltar-based insurance companies with the objective of generating a higher proportion of lower volatility business.

The fair value of the identifiable assets and liabilities of Markerstudy Group insurance companies as at the date of acquisition, as per IFRS 3, *Business Combination*, were the following;

	<i>Provisional fair value recognized on acquisition</i>
	<u>USD ('000)</u>
Assets	
Cash and cash equivalents	95,449
Insurance and other receivables	840,783

Insurance contract liabilities	1,138,961
Provisions, reinsurance and other payables	<u>692,924</u>
Total liabilities	<u>1,831,885</u>
Total identifiable net assets at fair value acquired (provisional)	<u><u>146,980</u></u>

Intangible assets comprise the value of licenses and Framework Agreement.

As part of the transaction related to the sale and purchase of the Carriers, Qatar Re and Markerstudy Group have signed a framework agreement (“Framework Agreement”), which will govern their relationship for the coming 10-year period. Under this agreement, the Carriers will have the right to first refusal for all the non-life insurance business generated by Markerstudy Group. The Framework Agreement has been valued by applying the dividend discount model (“DDM”) under the Income Approach.

Markerstudy Group insurance companies have regulatory licenses from the Gibraltar Financial Services Commission (GFSC) to underwrite non-life insurance business in the United Kingdom and the rest of the European Union. Under the Cost Approach, the value of the licenses of the Carriers were estimated to be approximately USD 7,555,000.

30 POST BALANCE SHEET EVENTS

COVID-19 Pandemic

The Novel Coronavirus (COVID-19) has been identified as a non-adjusting post balance sheet event and an assessment has been undertaken by management to evaluate the impact on the Group.

At the point of issuing these financial statements, the COVID-19 pandemic continues to develop. Whilst the final impact on business remains uncertain, the Directors continue to monitor the impact of the pandemic on the Group's operations, its balance sheet with an emphasis on solvency levels and specifically ensuring that its liquidity position is appropriate in the current business environment.

The Group's current operational focus is on ensuring its staff welfare while maintaining business continuity. Following government advice across all operating territories, the Group has mandated working from home for all employees and restricted all business air, rail and bus travel. In this time, the Group has ensured operational continuity, successfully maintaining business as usual. This is being achieved by ensuring virtual connectivity between the Group's management and its teams through the use of technology and regularly scheduled calls and ensuring that the operating systems are fully accessible to the teams. Following various working from home testing exercises, management is confident that adequate systems and processes are in place to ensure that the Group continues to deliver a high-level of service and responsiveness to clients and other stakeholders.

The Group is committed to ensuring that its staff receive adequate support and guidance in maintaining their personal health and well-being.

On 31 March 2020 the Group's invested assets were \$2.1bn, representing a circa 5.5% decrease in valuation as a result of the ongoing market turbulence caused by COVID-19. These unrealised losses have since partially reversed.

In support of the 'Emerging Risks Survey – Coronavirus Pandemic' filing to its regulator, the Bermuda Monetary Authority, the Group has performed a detailed analysis of its underwriting exposures. The Group expects significant offsetting credits against the net claims that could arise as a direct result of the pandemic; those claims largely stemming from potential business interruption claims.

Credits are expected within the impacted lines of business, where a significant proportion of these claims would already be expected by the Group, albeit in other forms, and as such the business plan remains valid.

The Group's well diversified portfolio is expected to mitigate the impact further. Since year end, with the implementation of national lockdowns across the globe, the Group has seen a significant reduction in loss notifications in some lines of business that will offset impacted lines of business, providing further credit.

Although it is still too early to estimate the impact of the pandemic with full reliability, with a wide range of possible outcomes, it is expected to be well within the tolerances of the Group. In all scenarios assessed, the Group's solvency capital requirement is not breached. The Group's central case is that the impact of COVID-19 is a fall in solvency from 149% to 128%.

GOING CONCERN

The Group has assessed its going concern judgment with respect to COVID-19 by stress testing the balance sheet and solvency across a number of scenarios and reviewing its forecast liquidity. In all scenarios assessed, the Group's solvency capital requirement is not breached.

Based on this, Management concludes that the Group continues to operate as a going concern. Management is continuing to monitor the impact of the pandemic on an ongoing basis and the ultimate parent company, QIC, will continue to support the Group as necessary in light of the Parental Guarantee that currently stands active.
